

# Red Cell

Captain Tejas M. Patel

# Purpose

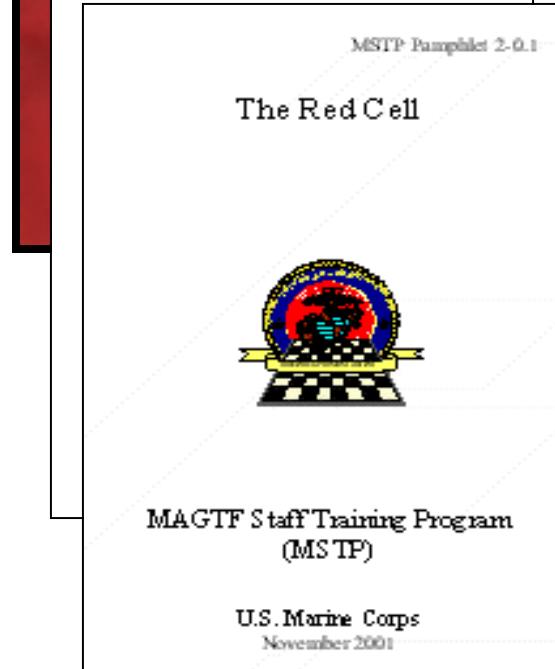

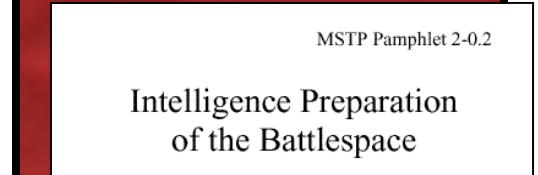

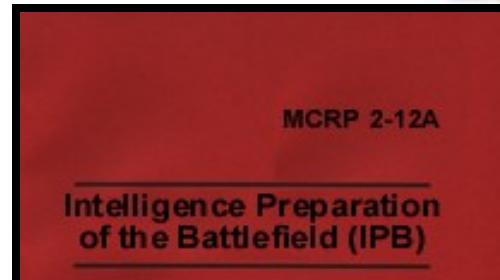

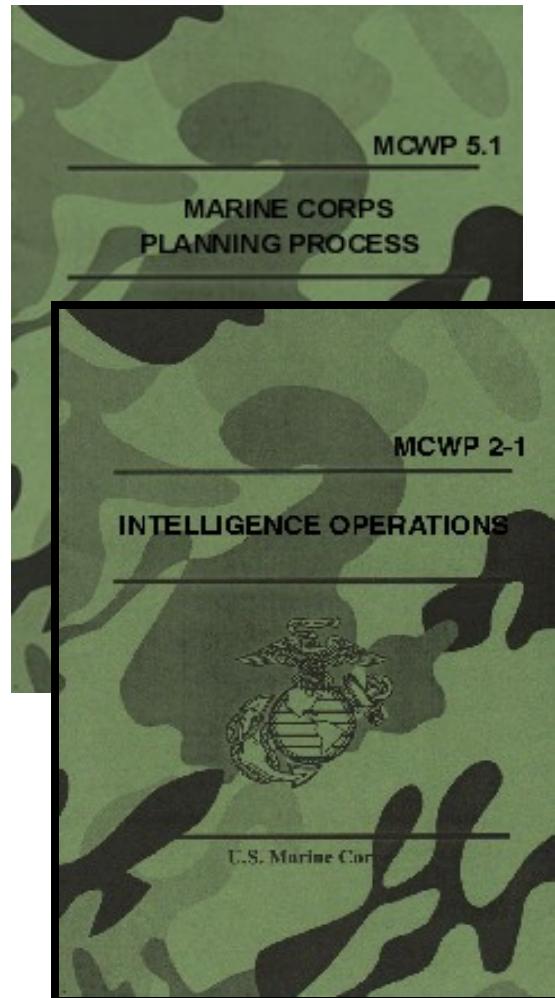

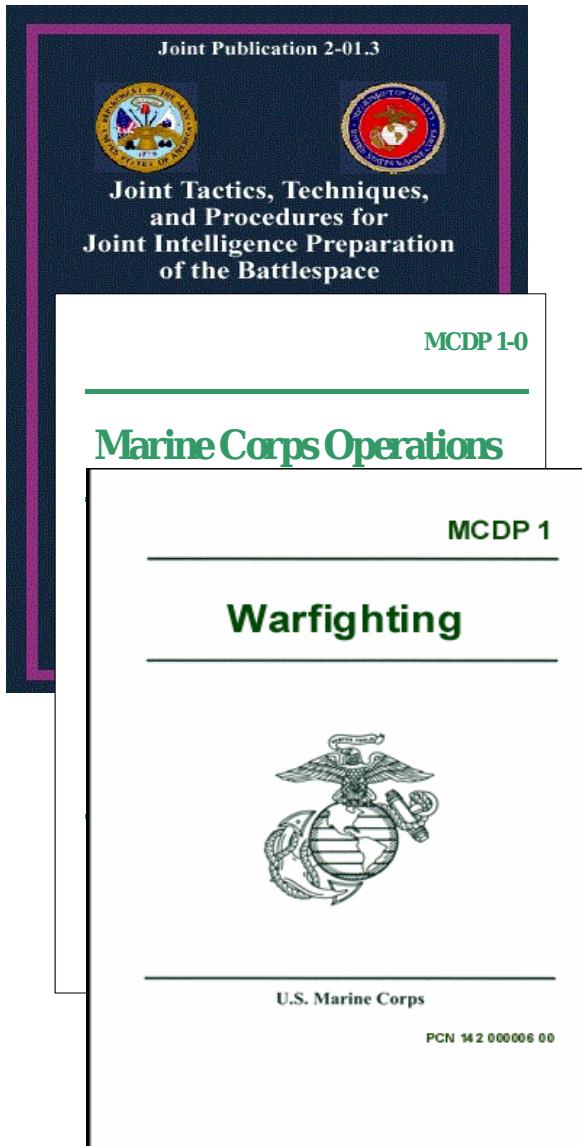

MSTP

- Describe the role of the Red Cell
- Describe the composition of the Red Cell
- Describe the actions of the Red Cell during MCPP

# References

MSTP

# Purpose of the Red Cell

MSTP

- Provide the OPT with additional operational analysis of the enemy's capabilities, simulating/employing enemy doctrine throughout planning
- Red Cell tailored to the needs of the OPT
- Red Cell employs threat doctrine and equipment; does not mirror image the MAGTF

# Focus on the Enemy

MSTP

“However absorbed a commander may be in the elaboration of his own thoughts...*it is sometimes necessary to take the enemy into consideration.*”

Sir Winston Churchill

“Since war is a clash between opposing wills, all decision making must first take our enemies into account, recognizing that while we are trying to impose our will on them, they are trying to do the same to us.”

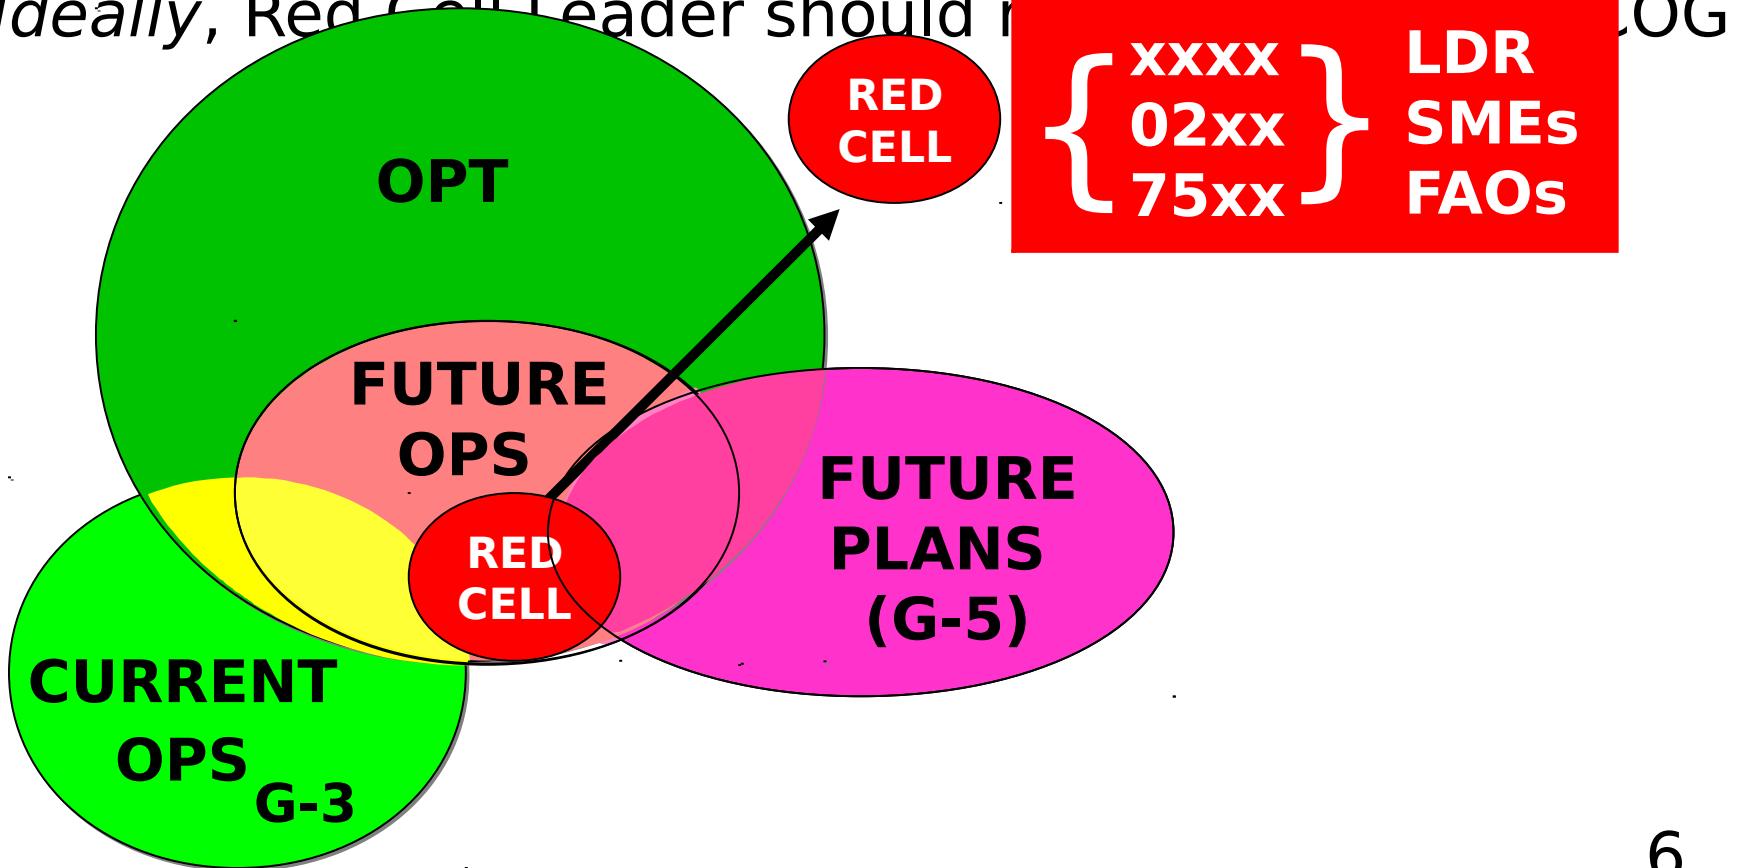

MCDP 6

# Red Cell Composition

MSTP

- The G-2 Rep to the OPT is not the Red Cell at the MEF level
- Red Cell should reflect enemy capabilities
- *Ideally*, Red Cell Leader should not be a COG

# Red Cell Requirements

MSTP

- Close to the OPT, G-2, and Intel analysts
- Must be able to store classified material in work space to include IPB products such as the MCOO, maps, matrices, etc.
- Sufficient to accommodate Red Cell Staff
- Adequate resources

# Role of the Red Cell

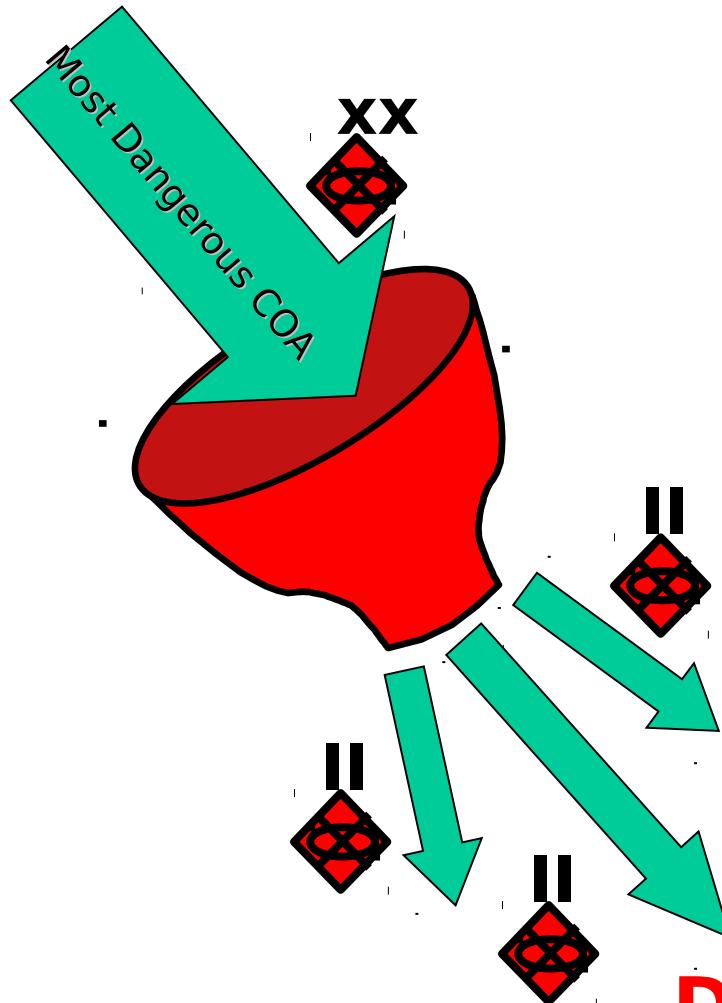

MSTP

**Take the “what”...**

## Inputs:

- ML COA
- MD COA
- MCOO
- IPB Products
- HVT List

## Confirms:

- Key terrain
- Avenues of approach
- High value targets
- Critical vulnerabilities
- Doctrine and tactics
- Capabilities

**...Deliver the “how”**

# ... Deliver the “How”

MSTP

- Examine and refine threat COAs from the perspective of the six warfighting functions represented in the threat force
- Must also look at threat specifics such as: C2, NBC, training, education, morale, etc
- Red Cell focuses on enemy CAPABILITIES
- Using THREAT DOCTRINE and enemy equipment, and the MCOO, the Red Cell ensures time and distance factors are realistic and accurate

# Staff Cognizance

MSTP

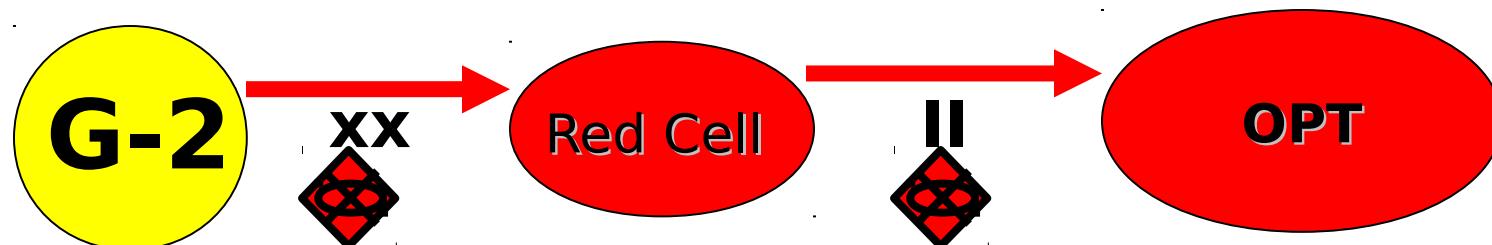

- The CG will choose the best qualified individual as the Red Cell OIC. Red Cell often works best under the cognizance of the G-2
- Red Cell members must remain constant throughout the planning process
- The Red Cell coordinates with the G-2 to share intelligence to increase the OPT's situational awareness
- The Red Cell must not significantly alter the G-2 ML/MD COAs without G-2 concurrence

# G-2 Interaction With The Red Cell

MSTP

1. Production and Analysis Co (Intel Bn) AND G-2 Analysts:
  - METOC/ COGs/ CVs/ PIRs
  - IPB: MCOO with Situation & Event templates
  - COAs: Most Likely / Most Dangerous
2. COLLECTION MANAGEMENT:
  - NAI linkage with Red maneuver
  - R&S planning
3. Subject matter experts
4. Target Intel: HVTs & HPTs

# Red Cell Helps The G-2 By...

MSTP

- Developing threat sync matrix
- Proposing threat **(red)** reaction to friendly **(blue)** action during war game
- Refining NAIs; during war game propose TAIs and threat DPs
- Refining situation templates
- Confirm HVTs, assist identification of HPTs

# Enemy / Red Cell Synch Matrix

MSTP

TIME/EVENT		PRE H-HOUR	H-HOUR
Enemy Action		Counter-Recon sec area	Execute registered fires; armor moves to assembly areas
DECISION PT.			Enemy DP 1 - Advance of 1st AD
MANEUVER	DEEP		Counter attack 1st AD attack - enveloping force
	CLOSE		523rd attacks - direct press for
	RESERVE	522nd - 1 Bn - Res	
	REAR		
	MOBILITY		Restrict US use of roads
	C-MOBILITY		Counter Eng assets of 1st AD - east flank
INTELLIGENCE		Confirm 1 <sup>ST</sup> echelon disposition	Counter Recon in zone
	NAI	I & W; NAI 29, 11, 4c, NAI 1 - 205 th react to 1st AD movement	
FIRES	LETHAL		Destroy 1 <sup>st</sup> AD/ neutralize other US forces
	NON-LETHAL		
LOGISTICS	SUSTAINMENT		CS assets to assist 524 <sup>th</sup>
	DISTRIBUTION	Disable Port/ US forces	Establish Refueling areas
COMMAND & CONTROL		Destroy US Command and Control	boundary shift executed
	IW/C2W	ES and EP missions; EOB nodal analysis	Attack US C2 nodes
FORCE PROTECTION			Counterreconnaissance in zone; Conduct insurgency operations
	NBC/AIR DEF		TMD assets deployed and ready

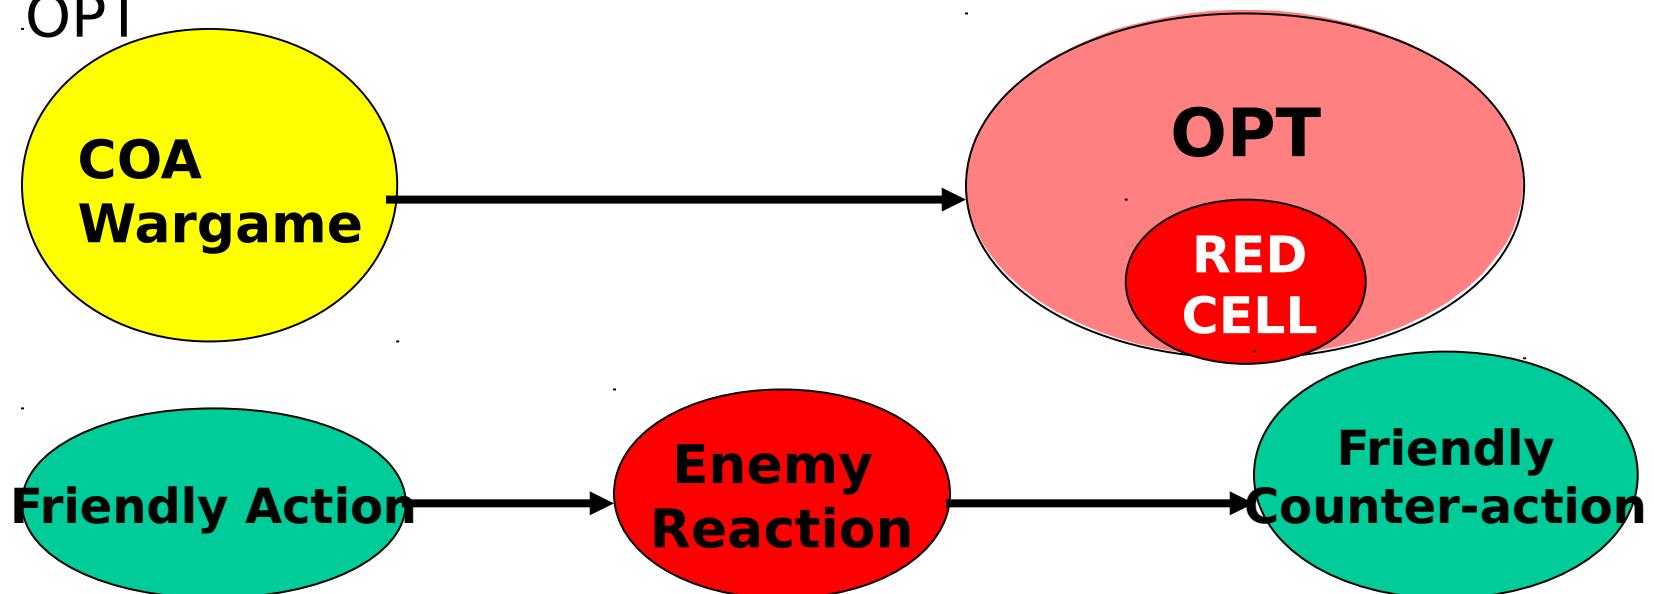

# OPT & The Red Cell

MSTP

A. Pre-war game: OPT leader ensures the Red Cell receives updates to staff planning timelines, commander's war game guidance/criteria, and new developments in situation. Intel reps in OPT and Red Cell must communicate to ensure G-2 is in sync w/Red Cell

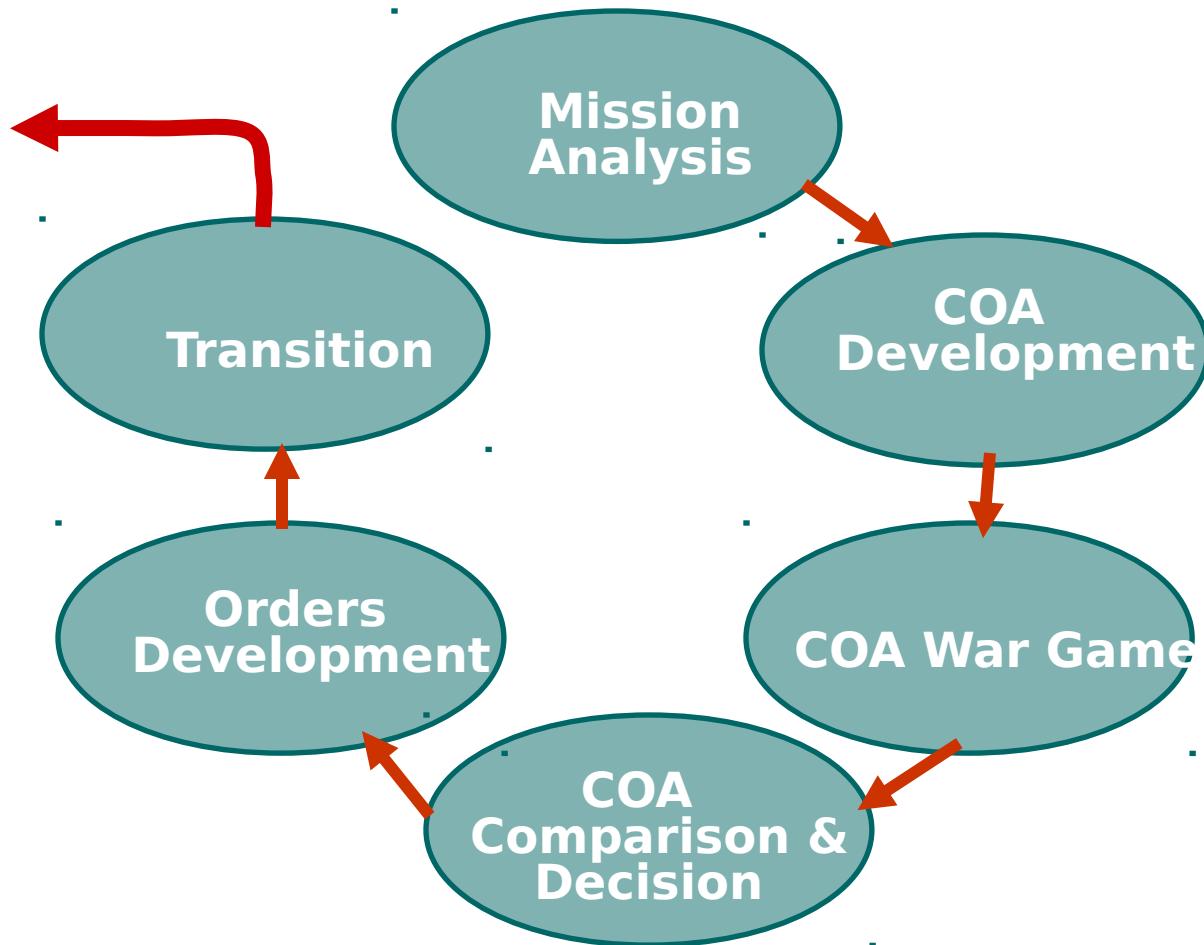

B. During war game: Red Cell is employed as part of the OPT

# The Red Cell In The MCPP

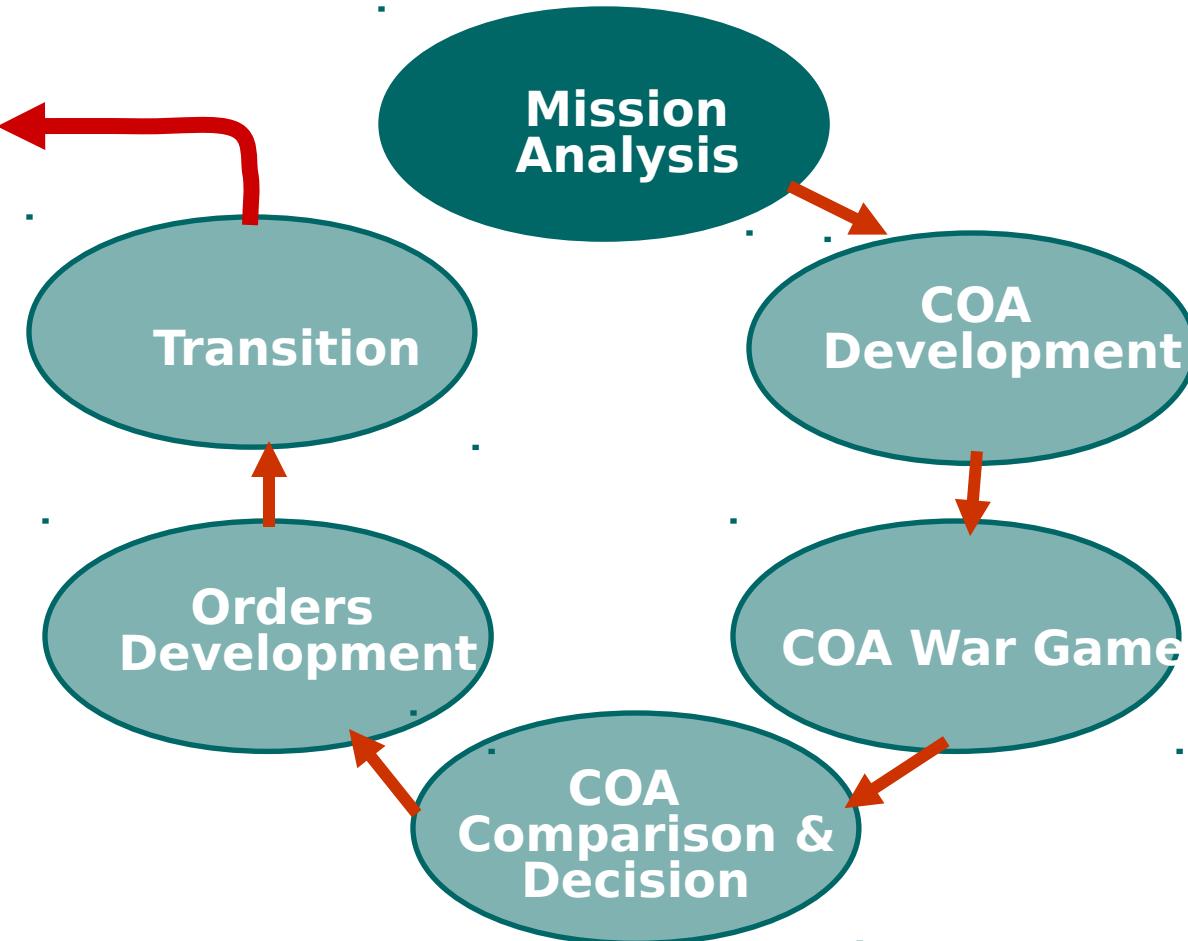

MSTP

# Red Cell In Mission Analysis

MSTP

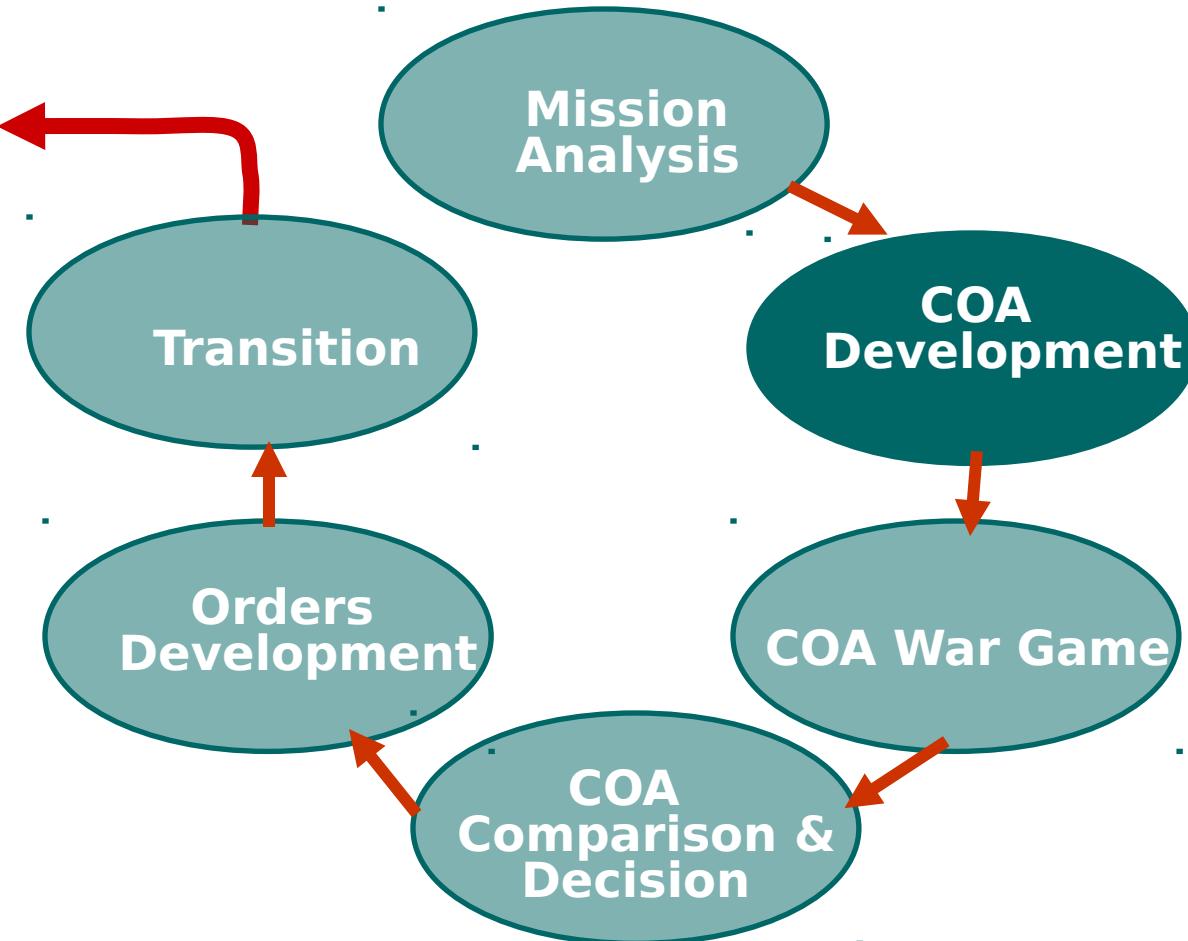

- Red Cell formed/organized
- Coordinate with the G-2
- Gain and develop situational awareness
- Analyzes enemy doctrine
- Identifies enemy COGs and CVs for each COA
- Collects and analyzes information

# Red Cell In COA Development

MSTP

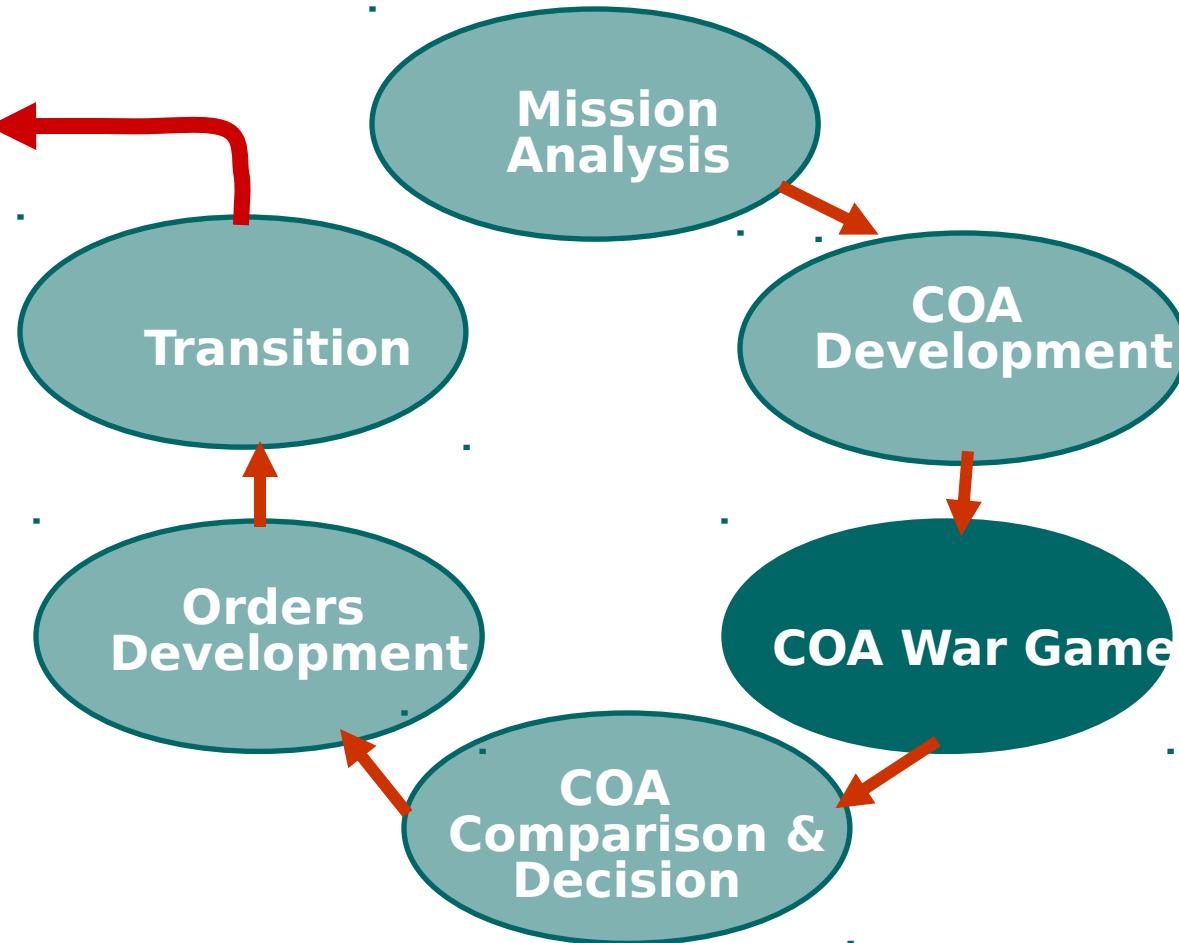

- Detailed Enemy COA Development
- Analyze enemy Capabilities
- Predictive Analysis
- Conduct mini-OPT against OPT-developed friendly COAs
- Draft Decision Support Matrix and Decision Support Template are produced
- Prepare to war game with

# Red Cell In COA War Game

MSTP

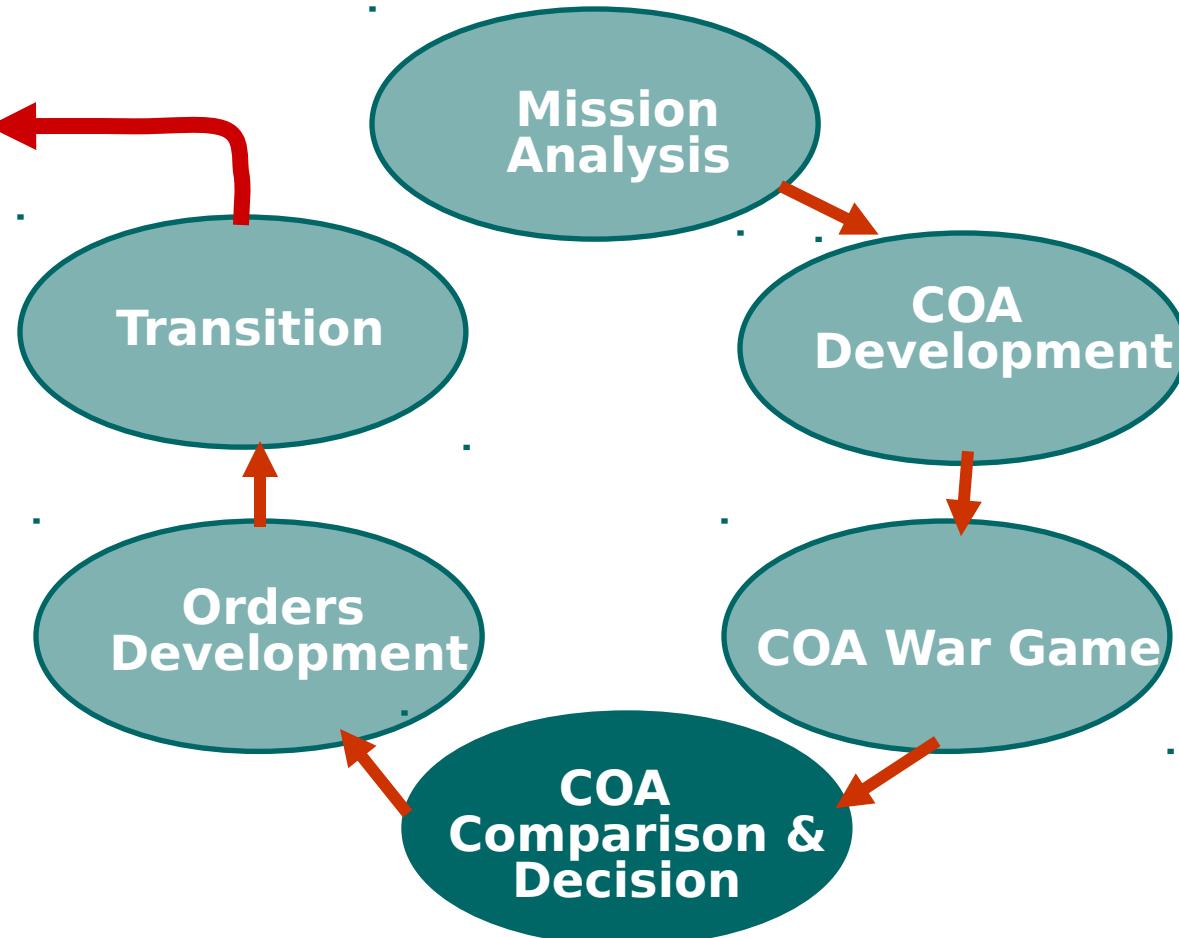

- Presents doctrine-based enemy reactions to friendly actions
- Wargaming techniques chosen
- Pre-start presentations
- Describe enemy actions taken prior to commencement of operations
- Ensure enemy actions are realistic, operationally sound.
- Does not “mirror image” the MAGTF

# Red Cell In COA Comparison & Decision

MSTP

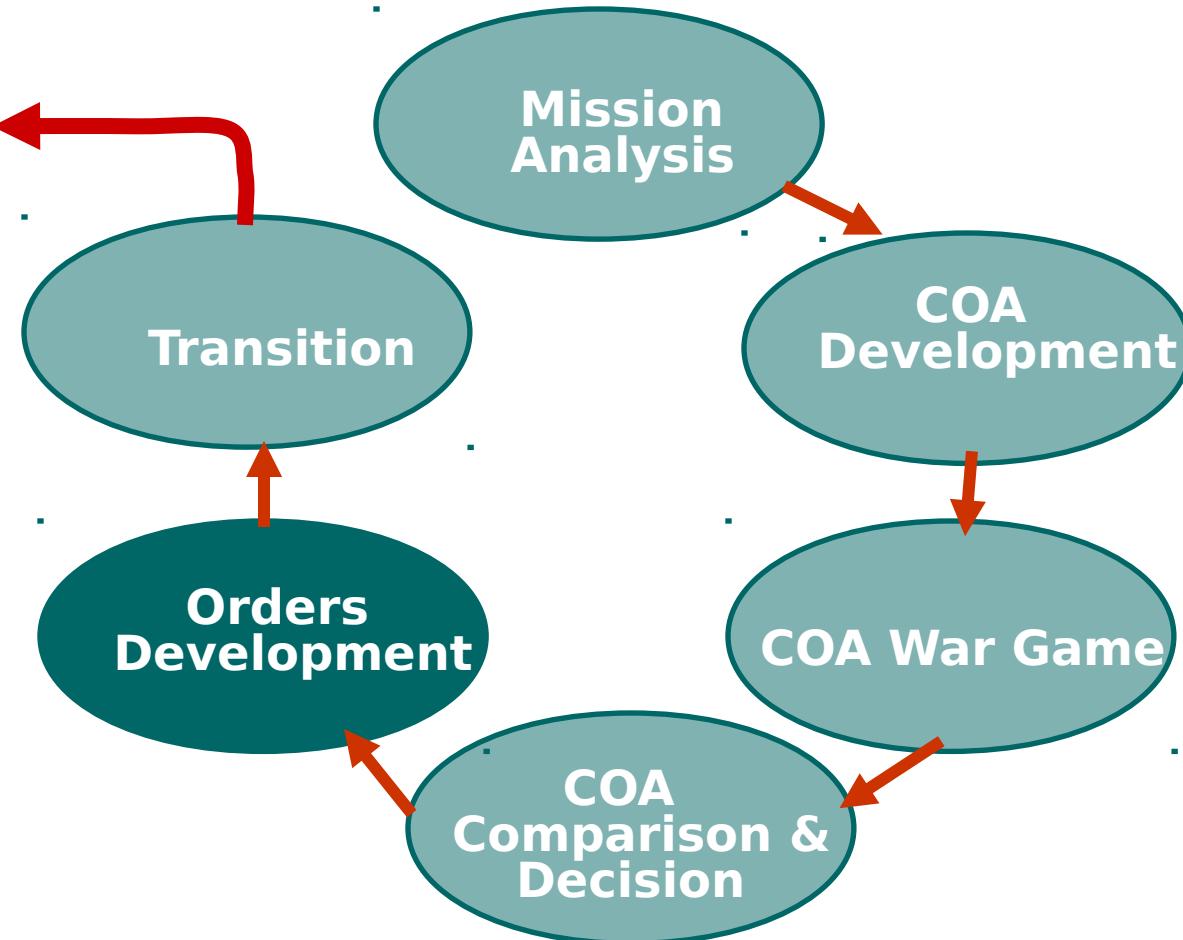

- Red Cell records its findings for the OPT, and continues to assist future operations as required

# Red Cell In Orders Development

MSTP

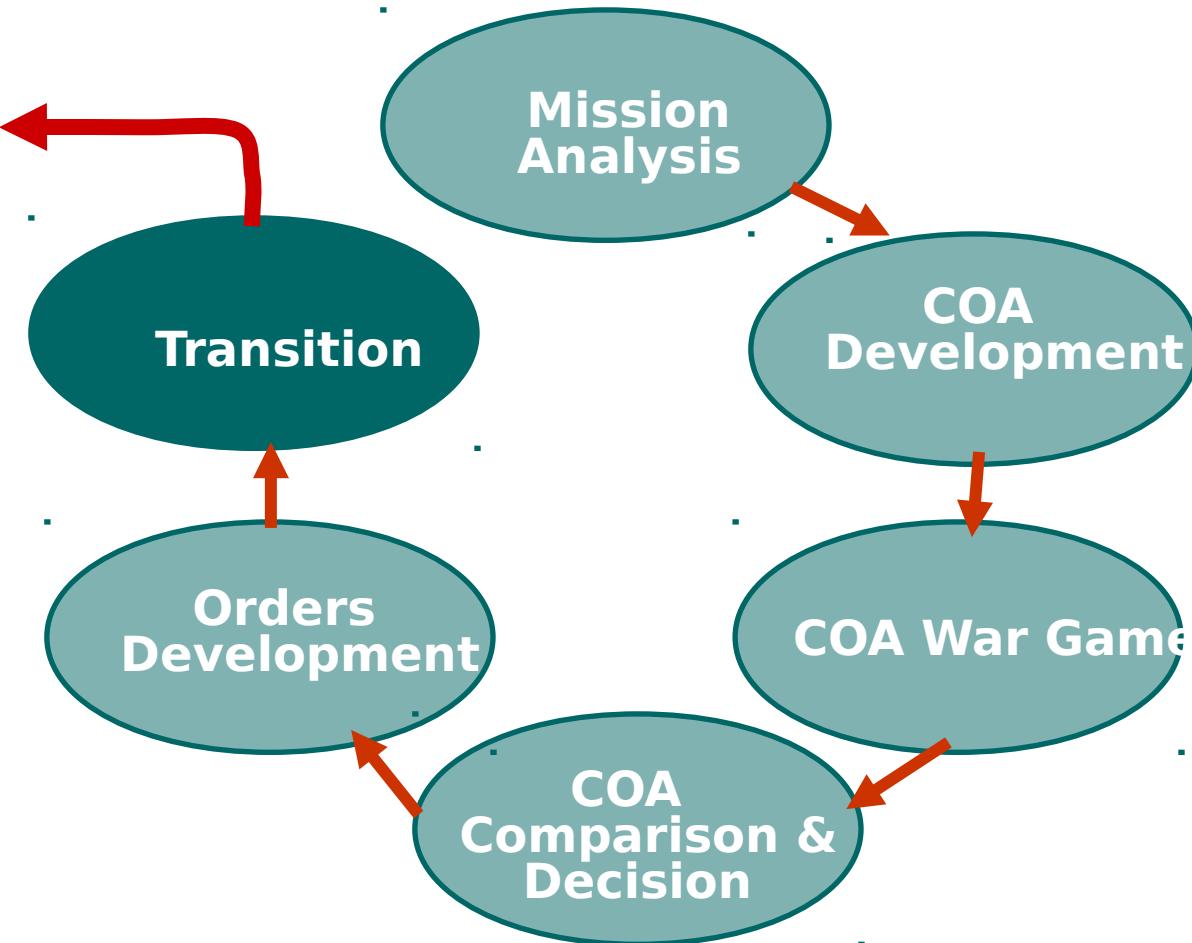

- Discretion of the Commander with regards to status of the Red Cell
- All products are transferred to the OPT or the G-2

# Red Cell In Transition

MSTP

- Red Cell may remain intact to ensure proper focus of the OPT remains on the enemy

# OPT & The Red Cell

MSTP

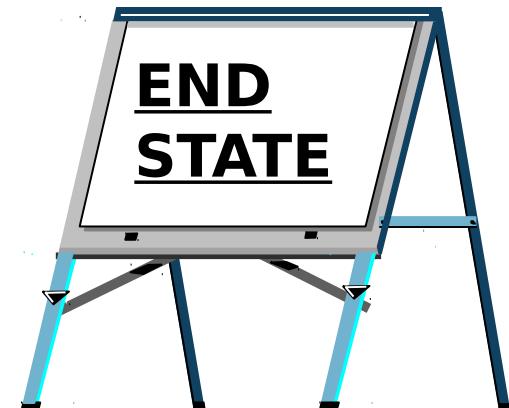

- OPT records strengths and weaknesses of friendly COAs during war game
- OPT records the rationale for why/how threat and friendly decisions were made
- OPT ensures that Red Cell validates Red:
  - COG(s)
  - Critical vulnerabilities

# Red Cell Helps OPT To...

MSTP

- Validate and refine:
  - HVTs
  - Threat COG(S)
  - Threat critical vulnerabilities
  - Threat resource requirements
  - Time factors
  - Distance factors
  - Location of NAIs, TAIs & threat DPs

# Summary

MSTP

- Described the role of the Red Cell
- Described the composition of the Red Cell
- Described the actions of the Red Cell during MCPP
